

PECOS TO CELEBRATE ITS ADVENT AS AN OIL TOWN, MAY 12 AND 13

PECOS, Texas, April 15.—Pecos will celebrate its advent as an oil town on May 12 and 13, with a series of cow country sports, and a barbecue in honor of the Fighting Journalist, an organization of World War correspondents, who are to close their first annual reunion here on those dates.

Steeple and goat roping contests, fully complying with the law of Texas, riding contests and exhibitions are planned by the American League of Pecos, to entertain their fellow cow country veterans, to be followed by the barbecue, and an entertainment in the evening.

The writers are to meet in Fort Worth on May 4 for a convention, and will then make a tour of the oil country. They will reach Pecos on the morning of May 11, and will be taken through the wonderful irrigation district of the Pecos valley to the Rio Grande, southwest of Pecos.

The following day they will be shown the irrigation district along the Pecos river, around Barstow, and the area district that will be placed under cultivation upon completion of the Red Bluff irrigation project, the preliminary survey for which is soon to start.

Airplane for Oil Scouts Has Perils

PECOS, Texas, April 15.—Scouting for likely appearing oil land in an airplane may appear to be an enjoyable sport, according to L. M. House, of the General Oil company, but it also has its drawbacks. For instance, Mr. House, while flying a few miles north of Pecos, crashed to land. Cactus and mesquite on one side, to the left there appeared a level stretch of country. Pilot McReids chose the level stretch and the plane swooped down, only to strike a bed of soft sand, and Mr. House found himself rolling along the ground. He picked himself up unhurt, but decided in the future to take a chance and try to dodge the mesquite.

CROWD WATCHES AT LAURA WELL

PECOS, Texas, April 16.—Dominion well No. 1, half a mile northwest of the Bell well passed through sand with seepage oil similar to the Toyah product at 150 feet. The ground is saturated with oil. Drilling has been continued.

Great excitement prevails in Pecos due to a report that the Laura well is in come in today. A crowd is at the well watching developments. Company officials seem expectant but make no definite statement.

OFFER \$488L. FOR PECOS OIL

PECOS, Texas, April 16.—Numerous offers of \$4 a barrel for the oil produced by the Bell well are reported by Mrs. J. Bell.

Two wells in the field have been sold, one to the Santa Fe, the other to P. W. Johnson, a Pecos ranchman. Refined oil from the Bell well has shown a strength of 19 percent, a very high grade lubricating oil which Mr. Bell has been informed he will be able to produce in his well after the topping plant now ordered has been placed in operation.

ARTISIA WELL ON A RAMPAGE

ROOSEVELT, N. M., April 16.—The Brown well, located 7 miles southeast of Artesia, has gone on another rampage, this time flowing at least 100 barrels of oil within a hour's time.

Charles R. Brown, a well known oil man of Tulsa, Okla., is the owner of this well and well at the time when the oil came gushing out. Mr. Brown believes that this well is good for at least 40 barrels of oil a day. He is now selling crude oil from this well at \$2 a barrel and says that his records will show that he has sold 15,000 barrels of oil from the well.

In 1915 this well was pumped. At that time it made from 10 to 50 barrels of oil a day. Since that time the condition of the casing in the bottom of the well has been in such a condition that it is impossible to cut off the water. Now it is only after an accumulation of oil and gas gets so strong that the oil is able to force itself through the great weight of water that the well blows off.

RIO ARriba COUNTY FIELD IS BECOMING MORE ACTIVE

CHAMA, N. M., April 16.—The Rio Arriba county oil field is, with the advent of spring, awakening to great activity. During the past month, with weather conditions abnormally winter, roads almost impassable on account of mud caused by the melting of snow and the spring storms, a great number of leases have been changed hands and now that roads are drying, up and weather conditions approaching normal it is expected that many more for the southern part of the county will visit the field.

Kenneth A. Herron has purchased a section of land and has subdivided it into smaller tracts and is reported as having sold a number to prominent operators in Wyoming and also a number to local operators both here and in Durango.

Drilling Pool Formed.—Kneadham & House have bought a 100 acre tract and formed a drilling pool, and expect to purchase another 200 acre tract for a pool now forming in Durango.

A. W. Kimble, of San Francisco, Calif., representing large operators of this state has purchased a 100 acre tract, about a mile and a half south of the E. T. Williams Oil company well, and is prepared to start drilling operations on it as soon as tools and equipment can be assembled.

P. R. Kingston, of St. Louis, Mo., and New York, has purchased a 500 acre tract and is now in the east arranging for a complete drilling outfit to be shipped here by July 1. Mr. Kingston is said to represent four or five large capitalists of the east, who are large operators in the oil fields of Oklahoma and Texas.

B. R. Ellis, of Los Angeles, Calif., an old and well known operator in many of the oil fields of the state, has been in and around Chama during the past month and has secured leases for quite a large acreage for himself and California clients and expects to remain here during the summer.

The roads in and around the Rio Arriba oil field have dried up so that it is now possible to go most anywhere with a team. The main road can be travelled by automobile within a week and many oil men are arriving to look this part of the country over.

GASOLINE SALES TO CAR OWNERS LIMITED AT BISBEE

Bisbee, Ariz., April 16.—Sales of gasoline to motor car owners were put on a restricted basis here yesterday at a meeting of representatives of retailers and wholesalers.

Private cars will be allowed one gallon a day each; commercial cars, trucks and rent cars may buy two gallons a day each. Motorists traveling through will be allowed to buy only enough gasoline to take them to the next halting place and will be allowed none if they have in their tanks a supply sufficient to take them through. It is estimated that the Warren district has only enough gasoline to last ten days at the normal rate of consumption.

CURBSTONE BROKERS WIN THEIR CONTEST AT PECOS

PECOS, Tex., April 16.—The curbstone brokers have won their fight with the office brokers. The new Pecos city council has refused the petition of the office brokers, that they rescind the ordinance allowing the curbstone brokers to operate blackboards along the sidewalks, on which they list their holdings for sale. There are now more than 20 of these brokers in Pecos, the sidewalks of the main business streets being lined with boards.

El Paso Clubs Luncheon Five Days of Week

EL PASO is coming to be a luncheon club city. Since the launching of the luncheon club, the new Pecos city council has refused the petition of the office brokers, that they rescind the ordinance allowing the curbstone brokers to operate blackboards along the sidewalks, on which they list their holdings for sale. There are now more than 20 of these brokers in Pecos, the sidewalks of the main business streets being lined with boards.
